

# DIRECT HOME HEALTHCARE, INC.

## IN-SERVICE FOR OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) STANDARDS

Test your knowledge about staying safe around bloodborne pathogens by marking true or false.

	TRUE	FALSE
1. Infection control procedures only apply to blood exposure		
2. Contaminated sharps (needles, broken glass, etc.) must be placed in a covered, puncture-resistant, leakproof container that is red or has a biohazard symbol.		
3. Latex gloves will keep you from being stuck by sharps.		
4. You must wear a mask and eye protection if fluids could splash or spray into your eyes, nose, or mouth.		
5. There is no need to cover cuts, scrapes, rashes, etc., if you're wearing gloves.		
6. There is no vaccine for Hepatitis B virus (HBV).		
7. If you come in contact with blood or other body substances, you should wash your skin immediately.		
8. Gloves are needed only during surgery, autopsy, and embalming.		
9. You must clean your equipment and work surfaces at the end of your shift and when they are visibly contaminated.		
10. The Bloodborne Pathogens Standard applies only to health care workers.		

**I have read the booklet "About Bloodborne Pathogens in health care settings."**
